NATIONAL BANK STOCKS.

Greene Cananca

New York. Oct. 7.—Stocks were dull throughout the season to-day, only two lisuses attracting attention. These were Beet Sugar and Allis-Chalmers bonds. Stock of the Beet Sugar Company advanced sharply to within a fraction of its high record price. Allis-Chalmers bonds broke to a new low record price. Allis-Chalmers shock also reached new low records, the common at 2 and the preferred at 13. A sharp advance in sterling exchange forecast another rise in the Bank of England's bank rate for the coming week. This advance of the English hank rate is due primarity to the normous volume of American Cotton it is taking.

Deciliaes Are Shows.

Activity in the stock market the past week was at the expence of quoted values, nearly all the leaders showing some declines. These declines, however, were not important and there was evidence that strong, even though temporary, support is under the market. Violent movements in either direction are not wanted. The market has discounted the crop disaster, and a great deal more, so that the strongest financial interests are sanxious to let it rest a while to see whether something favorable may not develop in the political situation.

Perhaps most important of the news announcements of the week were the declaration of a dividend at the rate of a per cent on Rubber common and the admission by President Vall, of the American Telephone and Telegraph Company, that on securing an interest are in the Western Union it was discovered that some campalagn contributions were carried as assets in the Surplus account.
